## **Mindtree Joins Apigee Digital Partner Program**

*API-first solution approach to enable faster, more seamless digital transformation*

**Bangalore (India) and Warren (NJ) – March 31, 2016** - [Mindtree](#), a leading digital transformation and technology services company, announced today that it has joined Apigee's Digital Partner Program. This collaboration with Apigee, a leading provider of application program interface (API) management software, enables Mindtree clients to transform their digital user experience quickly and seamlessly.

The Apigee – Mindtree collaboration will provide clients an approach that uses APIs to transform their user experience with agility while still connecting with their legacy, back-end data. This will allow clients to manage their transformation at two speeds – one, a rapid deployment of a new customer interface, and a second, slower transition of legacy systems, which are historically more embedded, and as a result, more time-consuming to update.

As an Apigee Digital Partner Program member, Mindtree combines Apigee products with its technology expertise and services to design and implement digital solutions. This partnership with Apigee will allow Mindtree to enhance its industry-leading approach to digital transformation. This includes creating a fully digital customer experience focused on ease of use and efficient design; digitizing the full value chain from user experience to back end data using APIs; developing sense and respond systems that allow an organization to quickly pivot their approach based on new customer data; and shaping new innovative business models and partnerships.

“Companies across industries are looking to digitally transform, and it’s becoming clear that relying on old technology can’t get them there, said Chris Arisian, head of Strategic Business Development at Apigee. “Mindtree is committed to delivering digital transformation and technology services from ideation to execution, and we look forward to working with them to help Global 2000 enterprises embrace APIs to more effectively compete in today’s digital economy.”

“We have long been focused on an API-first approach for Digital transformation, to scale and reliably interconnect a company’s back end systems.” said Paul Gottsegen, chief marketing and strategy officer for Mindtree. “Our collaboration with Apigee will enable clients to drive increased agility and innovation as they deploy Digital-led growth initiatives,”

### **About Apigee**

Apigee® (NASDAQ: APIC) provides an intelligent API platform for digital business. Many of the world's largest organizations select Apigee to enable their digital business, including 30 percent of the Fortune 100, five of the top six Global 2000 retail companies, and five of the top 10 global telecommunications companies.. Apigee customers include global enterprises such as Walgreens, Burberry, Morningstar, and First Data. Apigee is headquartered in San Jose, California and has over 400 employees worldwide.
