

RISING STAR: MINDTREE

Overview

Mindtree offers BW services that can work either independently or with SAP Business Warehouse and Business Intelligence solutions. The company's BW services range from defined data model implementation and data optimization to migration. The company has in-house capabilities and delivers BW/4HANA and BW on HANA services through 250 SAP BI professionals worldwide.

Strengths

Comprehensive mix framework, tools and SAP offerings: Mindtree offers a good mix of in-house proprietary frameworks and other assets, including MOTIF to support shipping operations in the CPG industry, advanced analytics capability to initiate, incubate and install solutions, SAP Analytics Strategy Assessment to obtain a birds-eye view of analytics within organizations and SAP and non-SAP data quality services for both migration processes and ongoing operations.

Strong data warehouse use case support: Mindtree provides different SAP products for operational reports, dashboards and analytics, data warehouse and data mart operations, big data, real-time operational intelligence, decision support and predictive analytics to help its customers achieve business efficiency.

Broad implementation base and industry focus: The company has implemented BW/4HANA in several different ways across greenfield and brownfield projects. The company has good strength in this domain in the retail, fast-moving consumer goods (FMCG), insurance and automotive industries.

Caution

Mindtree should consider extending its U.S. partner network beyond SAP and model it on its global partnership network.

2019 ISG Provider Lens™ Rising Star

Mindtree, with its good mix of frameworks, tools, strong SAP product delivery capabilities, industry focus and greenfield and brownfield implementation experience, is a Rising Star in BW.
