

## MINDTREE

### Overview

Mindtree generated \$574.2 million in revenue from agile development in the U.S last year. The company has 4,182 employees who are dedicated to the agile development practice and five delivery centers in the U.S. It has a decade of experience in executing more than 100 agile projects (both onsite and offshore models). Some of its enablers across consulting, coaching and delivery areas which contribute to its customers' successful agile journey include executive workshops, continuous improvement, globally distributing agile, agile journey roadmap, innovation factory, new program launch, GATE framework, agile assessment, product management, release management, agile training and integrated services and solutions.

### Strengths

**Agile center of excellence:** Mindtree's agile center of excellence (CoE), located in Gainesville, Florida, offers clients with a location to help them realize their agile development. The center has agile experts, automated test engineers, dynamic architecture engineers, CD engineers, agile analytics experts and UX designers.

**Agile framework:** Mindtree's agile framework caters well to the needs of its enterprise clients. The framework blends SAFe, LeSS, scrum, extreme programming and Kanban and enables the company to become flexible and deliver business value to customers.

**Tools and metrics-led approach:** Mindtree offers a lightweight, metrics-driven process to assess the maturity of agile projects to identify the areas of improvement. It also provides tools and platforms for the distributed development and implementation of metrics to measure the progress of projects.

### Caution

Mindtree should cross-train its agile resources on multiple agile methodologies in order to widen the opportunity stream from agile-related projects.

## 2019 ISG Provider Lens™ Leader

Mindtree's combined package in the agile domain, through its CoE, framework and tools, helps enterprise clients to accelerate their digital transformation journey.
