

MINDTREE

Overview

Mindtree is a global technology consulting and services company with 21,000 employees, serving more than 350 clients in 15 countries. In the U.S., the firm has 14 offices, two delivery centers and generates \$730 million in revenue. It is a Larsen & Toubro Group company. Mindtree offers an end-to-end managed application and infrastructure services with MWatch, an integrated IT infrastructure management and service platform, to provide an integrated dashboard that monitors the network, servers, applications and other components that are combined to form a digital backbone.

Strengths

Proven automation capabilities: MWatch tools standardize operations and eliminate time-consuming manual processes. Decision Moments is a data analytics platform that uses learning algorithms to drive insights from large data pools and is powered by Microsoft Azure Cortana Intelligence Suite. The CAPE automated platform supports development, testing, application management, infrastructure and packages to enable continuous integration and delivery (CI/CD), DevOps, RPA and test automation.

Optimum backbone performance: Mindtree provides a single point of ownership and consolidated support for its "applistructure," services that combine the application and infrastructure responsibility. It offers an end-to-end solution to boost the performance of digital products running on a client's digital backbone. The firm provides managed cloud services, application performance monitoring with MWatch, microservices and APIs performance, CI/CD pipeline operations, and fine-tuning of the infrastructure for optimum performance.

Robust partnership ecosystem: Mindtree offers data infrastructure modernization with Databricks. This year, it received the preferred partner status within the Microsoft Azure Kubernetes Service (AKS) program. Mindtree provides Kubernetes infrastructure, application development, scaling and deployment. It maintains more than 35 partnerships, including with Adobe, Google Cloud Platform, Sitecore, Salesforce and Mulesoft. It recently joined the Hyperledger consortium.

Caution

Mindtree has a concentration of cases that leverage Microsoft's products. It should develop additional capabilities to improve its AWS offerings.

2019 ISG Provider Lens™ Leader

Mindtree offers smart services based on robust tools, including AI and analytics, to provide a streamlined digital backbone.
