

RISING STAR: MINDTREE

Overview

Mindtree is an IT outsourcing and managed services provider, co-headquartered in Warren, New Jersey and Bangalore, Karnataka. The firm has more than 1,000 certified FTEs and close to 2,000 engineers to support cloud services for clients in 12 different industries. It has a strong focus in the media and telecom industries, followed by the retail and travel and transportation sectors. It is an AWS advanced consulting partner and a Microsoft Azure strategic partner.

Strengths

Serverless offering: Mindtree leverages serverless platforms to solve business challenges and offers serverless computing solutions in two forms. One is Service Design, which is leveraged for uninformed consumption mostly for the CIO group and includes compute services like functions, data services like Cosmos, DynamoDB, integration services like SNS, ServiceBus, etc. The second is Solution Design, which uses a serverless platform for greenfield and modernizing applications as an offering to the CTO group.

Strong AWS and Azure capabilities: Mindtree has significant experience in migrating applications to Azure environment. The firm has a special relationship with Azure and is a Gold certified partner with Gold cloud platform competencies, including advanced specializations like Kubernetes. It has a joint go-to-market strategy with both AWS and Azure across geographies and co-sells propositions for their services and platforms. The firm has been recognized as a Microsoft innovation partner last year.

Caution

Although Mindtree has top levels of partnership with Microsoft Azure, it is still lagging with AWS. The firm is in the process of acquiring the AWS Premier Consulting partnership certification.

2019 ISG Provider Lens™ Rising Star

Mindtree's "Born Digital" approach has helped the firm gain a prominent position in the market. Its strong partnerships with hyperscalers and various automation initiatives for migration have enabled it to grow drastically in this space.
