One of the largest investment companies in the world gains access to critical MEDM skills and retains critical technical and functional knowledge

The client is among the largest investment companies in the world, and offers a vast range of investment and asset management solutions along with exemplary levels of service and support. Their range of solutions span equities, multi-asset, fixed income, liquidity, sovereign wealth funds and real estate and private markets.

Multiple takeovers and mergers within the group had made it necessary for the client to roll out a program for the strategic replacement of its heritage systems. Among its biggest challenges was to address the management of data, especially as bespoke development was not possible, given the complex regulatory environment in which the organization operates. The client needed a partner who could define the roadmap and high level plan for data management and help retain technical and functional knowledge within the organization. Without the best strategies and processes to manage data, the client would have to compromise on reporting, marketing and other transactions leading to business impact.

Their range of solutions span equities, multi-asset, fixed income, liquidity, sovereign wealth funds and real estate and private markets.

Multiple takeovers and mergers within the group had made it necessary for the client to roll out a program for the strategic replacement of its heritage systems. Among its biggest challenges was to address the management of data, especially as bespoke development was not possible, given the complex regulatory environment in which the organization operates. The client needed a partner who could define the roadmap and high level plan for data management and help retain technical and functional knowledge within the organization. Without the best strategies and processes to manage data, the client would have to compromise on reporting, marketing and other transactions leading to business impact.

SAVED FROM THE PAIN OF DATA MANAGEMENT

Mindtree stood up a distributed Agile Pod to work with the client’s team on the integration program and ensured that the client’s SMEs were released so that they could focus on value added activities rather than operational tasks:

- Access to a golden copy of reference data for various modules
- Access to a pool of MEDM experts, developers, testers and BAs who have an understanding of the client’s business context
- Ability to retain critical technical and functional knowledge within the organization
- Synergies between multiple integration programs in progress

IMPROVING DATA MANAGEMENT WITHOUT LINEAR INCREASE IN COSTS

The goal for the client was to set up additional MEDM capacity to manage the massive growth in data. Mindtree, which has been a successful technology partner for the client for over six years and has an in-depth understanding of the client’s technology architecture and business models, created a two-pronged approach for addressing the challenges. First, the solution focused on defining a roadmap and program plan, followed by the integration and consolidation of DWH. The second part of the solution was to provide MEDM skills.

Mindtree executed the solution with a team size of ~35 and has been engaged in augmenting MEDM skills for the client, increasingly taking ownership of critical programs.

The tools and technology environment for the engagement included:

- MEDM
- MS SQL Server
- SSIS
- Autosys

ABOUT MINDTREE

Mindtree [NSE: MINDTREE] is a global technology consulting and services company, helping enterprises marry scale with agility to achieve competitive advantage. “Born digital,” in 1999 and now a Larsen & Toubro Group Company, Mindtree applies its deep domain knowledge to 300+ enterprise client engagements to break down silos, make sense of digital complexity and bring new initiatives to market faster. We enable IT to move at the speed of business, leveraging emerging technologies and the efficiencies of Continuous Delivery to spur business innovation.

Operating in 18 countries and over 40 offices across the world, we’re consistently regarded as one of the best places to work, embodied every day by our winning culture made up of over 21,000 entrepreneurial, collaborative and dedicated “Mindtree Minds.”
